Prescriptions are available from this practice.

You may obtain prescription only medicines (Category V (POM Vs)) from us or ask for a prescription and obtain these medicines from another veterinary surgeon or pharmacy. We can prescribe POM Vs only for animals under our care. A prescription may not be appropriate if your pet is an in-patient or if immediate treatment is necessary.

Preparing a written prescription takes approximately 5 minutes. **Our written prescription fee is £9.00** (inc VAT) As with all our fees this fee may be subject to change in the future. This is a fee levied for the professional time taken producing a written prescription. Products we supply you with do not need a written prescription. Dosage/drug choice calculations are already factored in to the consultation fee and we charge a modest dispensing fee for medications that need measuring or counting out.

Our current prices for the ten POM Vs most commonly prescribed are
